

# 1 What?

Boostlet.js is a web framework that easily enables the development of medical image processing plugins through bookmarks using JavaScript injection.

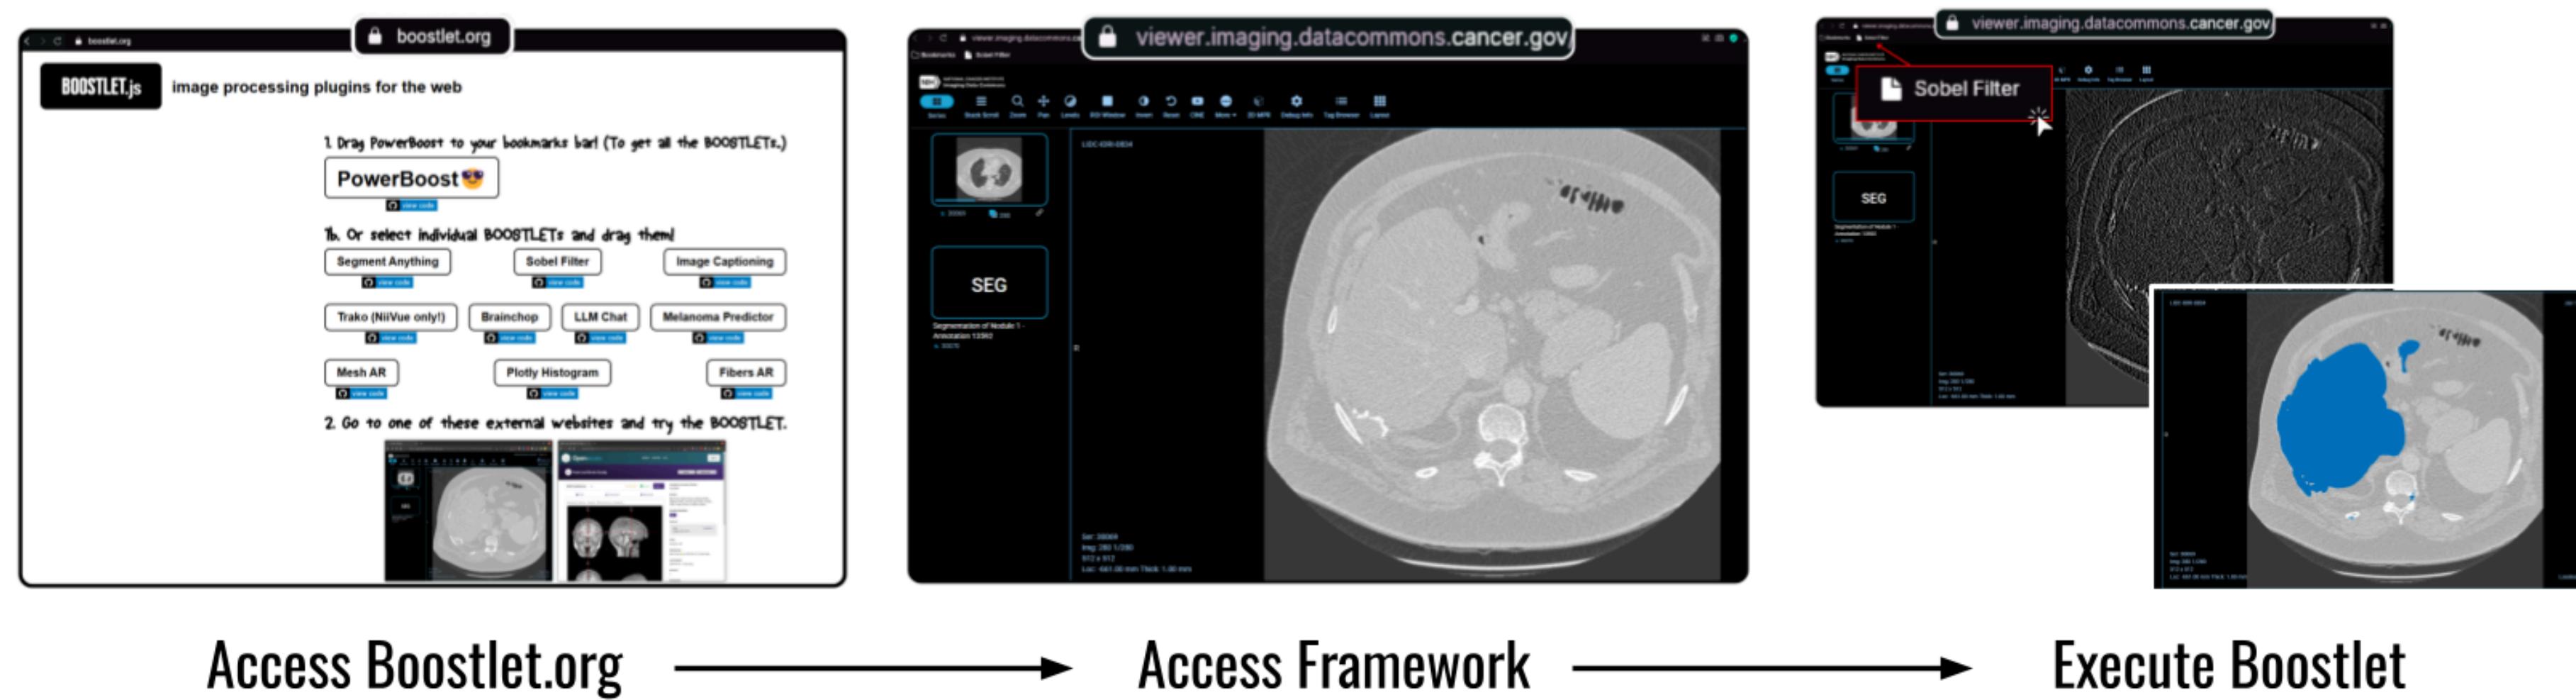

# 2 why?

# *Boostlet helps users:*

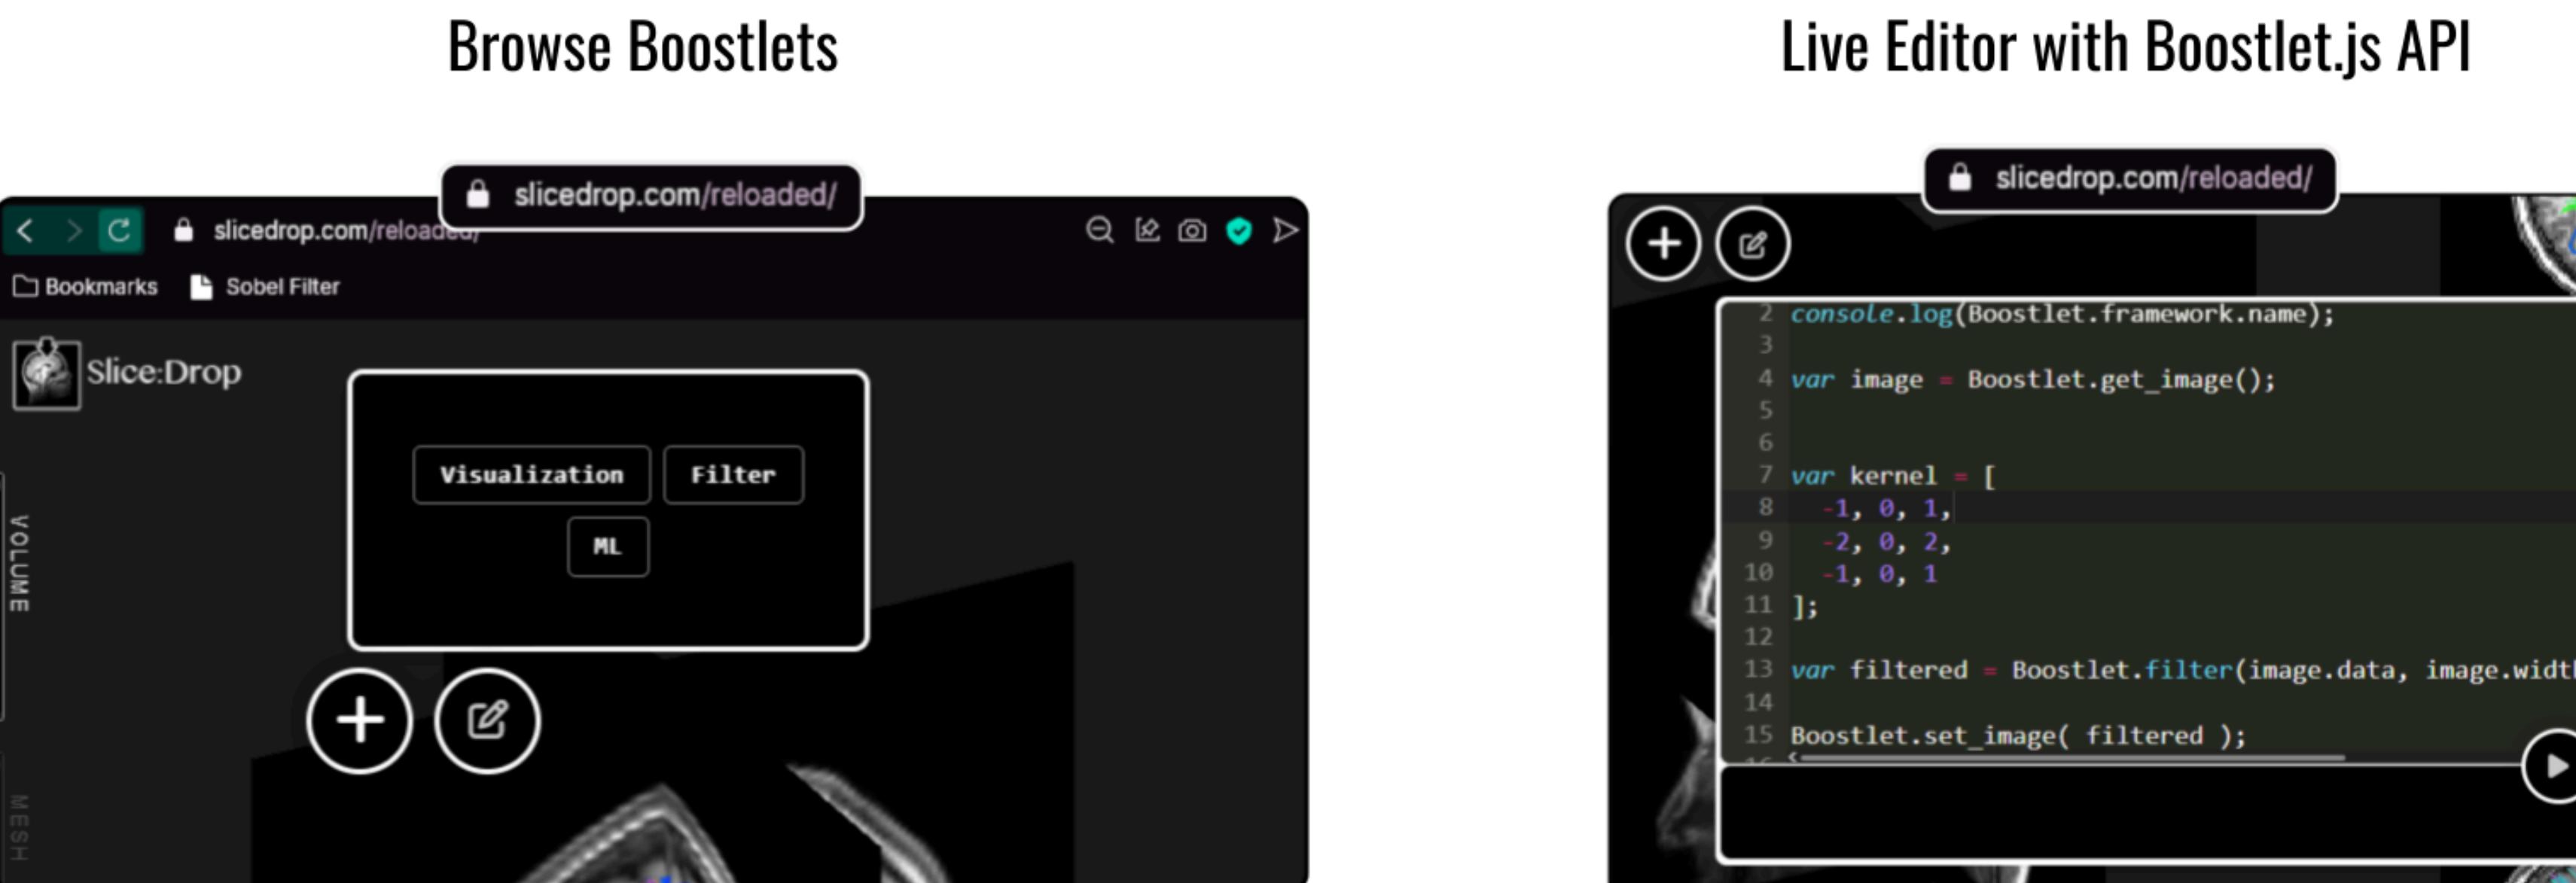

- Develop plugins using a standard easy API to access pixel data.
  - Share functionalities with the rest of the community.

# 1. Save Boostlet as bookmark and execute

## 2. Access all Boostlets + Live Editor with PowerBoost

# All open source:

# Boostlet
